Sort of. It will fall within making relationships with the Pipeline Road community, but specifically, it's to smooth out any first contact when we spend a day investigating a vent hole behind two community members' homes. Call me on my cell at [Personal Phone/Ex. 6] if you want to discuss.

I have a conference call with Freya to talk about R6 and the Grants mining district from 10:30 to 11 am today.

Hi Mark—oh I get it—you don't need John to help Secody, you need John to help instead of Secody, my mistake. Is this work related to the NECR/Quivira CIP?

Krissy

Hi Blair, Secody is out on emergency travel to help R8 with outreach on Navajo for the Gold King mine spill.

Could I ask John to contact Edison and then to spend one day at the site on Thursday?
